As Others See Us.

Ottawa Journal: Premier Aberhart of Alberta declares modestly he has "no particular desire" to be prime minister of Canada; that in any event it would take ten years before social credit could be launched on a national scale, because first of all a majority of the provincial legislatures must be captured by his disciples.

Things are never so bad but that they might be worse. We are to have ten years at least free from the uncertainty, the confusion, the loss of confidence, the perils of a clouded future, which are all Alberta so far has collected from its political prodigy.

If we can imagine the situation in Alberta reproduced on a national scale—public and private credit ruined, contracts violated by legislation, the people waiting impatiently for the miracle of something for nothing, a flight of capital over the border, experiments with currency, and so on—we can form some idea of what an Aberhart regime on Parliament Hill would mean to us all.

Local Lucky Ladies.

Our town was well represented at the Friday dance at Holborn, given by UFWA, and Ursel's Melody Four supplied the music. Stony's ladies also were fortunate when the drawing took place, Mrs Florence Goebel winning the quilt and Mrs Johnny Trapp the handsome cushion.

New Sash and Door Factory.

The new building on Third avenue, next to Contractor E Anderson's shop, is nearing completion, and will shortly be ready for occupancy. The new firm, Bierwaldt and Enders, who will occupy the building, will manufacture door and sash, cupboards and cabinets. There is said to be a big demand at the present time for this class of work, and no doubt the firm will be kept busy.

The firm has had the Calgary Power Co.'s service installed.

The Hockey Boys.

Little has been done, so far, toward the reorganization of the hockey club, as no doubt all are waiting to see who will get the contract to run the skating rink this season. As the Councillors meet tonight, this matter will probably come up for discussion. For the good of the sport, it is hoped that the Councillors will be as generous as they have been heretofore.

Mr E Ender, the rink manager for the past three years, has been approached by the hockey players, with the idea of inducing him to again take hold. In the event of the players not being able to get Eddie to accede to their request, another person will probably be found who will be willing to carry on. The skating and hockey season is near to hand, and the boys had better make haste.

Jacob Miller's Auction.

An auction of fairly large proportions is billed for Monday, Nov. 16. Mr Jac Miller, who has been farming on a large scale for a number of years, is retiring and moving to town. The outfit to be offered without any reserve, include horses, cattle and a very complete equipment for operating a modern farm. The location is 1 mile east and 5 miles north of Spruce Grove.

Another sale is that for Isidor Jazensky, Thursday, Nov. 12. The location is on the Onoway Highway, just north of Carvel Corner, and there is no reserve.

There was a good auction in Stony on Saturday last of the stock and goods of Mr Breunestuhl. Mr B has moved back to Spruce Grove, where he will operate a crush ing mill.

The Wheat Problem

What to do about wheat is the greatest poser facing the Western Canadian farmer, not only for the immediate present, but for the long range future. Should he grow more, or should he grow less, or perchance, should he forget about wheat and turn his attention to other crops and other activities?

It is safe to say that this problem causes more sleepless nights on the Western Canadian prairies than anything else. It is probably not far from the truth to say that the question is uppermost in the mind of the average tiller of the soil the greater part of his waking hours and that during the night it perturbs his slumbers.

The farmer seeking the solution of the problem can get plenty of data which has a bearing on the subject and a plethora of advice without going far afield for it, but unfortunately for him and for his peace of mind so many complications are involved in the answer to the question and so many, so diverse and contradictory are the replies that the greater his research, the greater must be his confusion and the farther he is away from a conclusive solution.

To solve the problem with even a remote degree of assurance, the interrogator must not only be in possession of an immense amount of current available information but he must also be something of a prophet. He must be able to peer into the crystal of the future and divine what is ahead.

As there are no infallible methods of determining the unknown factors of production and marketing he must make his guess as best he can and shape his course accordingly.

If he guesses right and successfully runs the gamut of early and late frosts, grasshoppers, wire worms, cutworms, thistles and other noxious weeds, windstorms and hail, rust and other blight and pulls off a crop, he is faced with the possibility that it may be a drug on the market and that the reward of his labors may be little better than zero.

Added to all these and many other unrecorded uncertainties and handicaps comes a new threat to the existence of cereal farming as it is practiced on the prairies in the form of grain produced on an intensive scale under factory conditions and without the use of soil as a medium, a method discovered by two Englishmen after four and a half years of research and now being tested on a commercial basis.

To quote a Magazine Digest summary of an article appearing in the Sunday Express of London, "The investors claim that under their scheme which they call 'cabinet culture', one acre of floor space is equal to 1,760 acres of grass land; sixteen-worth of seed will grow 200 hundredweight of green fodder; one crop of fodder can be produced per day instead of one per year; a farmer feeding intensively cultivated corn instead of dry and grain to his livestock will save \$2.50 on every pig brought to bacon weight, \$3 on every bullock, and from 15 to 20 per cent. on milk production because they will be eating young, fresh food instead of old or dried grass which has been weakened of its vitamins.

"The inside of the cabinet contains rows of trays, each one with corn in a different stage of growth. To-day's tray holds seed. Yesterday's shows the white shoots. The shoots are larger and larger up to the tenth day when the fodder is full grown and ready to be taken out and eaten.

"There is no soil. On top of the cabinet is a tank full of water containing a small proportion of a chemical solution. The chemicals are those of which the soil consists. Enough solution to last a month costs \$3.75.

"In the bottom of the tank are small holes. For three minutes every 24 hours a tap is turned on and the tank drops 'rain' on to the top layer of trays. By the tenth day the growth can be lifted out of the tray like a grass-grown mat. The animals eat every scrap of it and the tray is left perfectly clean. There is no earth or dirt of any kind in the whole process."

"Animals fed on these intensive crops can be kept in yards or barns." It is reported that already efforts are being made to establish an agency and import some of these "factory-farms" to Western Canada.

If the inventor claims for this method of growing crops can be demonstrated as commercially feasible and economical no doubt the next step will be to improve the system to enable it to bring wheat to maturity, and if that can be done with success one wonders what will happen to the wide expanse of grain fields which constitute such a large section of the prairie provinces and what will happen to the investment in capital and labor which the farmers have sunk in hundreds of thousands of acres.

There is just one consolation for the prairie farmer and that is the fact that the scheme has not been proven a commercial possibility. Quod erat demonstrandum.

Transcontinental Air Route

Lieut.-Col. George A. Drew, Canadian military writer, told the Electric Club at Toronto that immediate establishment of a transcontinental air route is essential if Canada is to take its proper place in the world. Canada's best contribution to empire defence can be made through aviation, he said.

January is the official birthday of all thoroughbred horses.

What do they mean about "the good old days"? Well, the answer may be an item in the 35-year-old column of the Brantford Expositor: "The relief officer, reported an outlay of \$24.72 during August."

Roundup Of Reindeer

Thirty Thousand Reindeer To Be Banned In Alaska

A roundup of 30,000 reindeer, one of the largest in Alaskan history, was planned by a United States official.

For the purpose of slaughtering some, earmarking and caring for the health of others, great corrals will be built 50 miles inland from Point Barrow.

There the deer will be counted and marked after they have been herded by the Eskimo from the Arctic plains for hundreds of miles around.

Instead of branding the reindeer, the Eskimo will mark yearlings and fawns with various shaped slits and knife nicks in the ears.

New Minister To Canada

Belgium Proposes Sending One In Addition To Consul

Belgium proposes to send a full-fledged minister to Canada, in addition to the present Belgian consul. Perhaps the Belgian government realizes that Canada is the most solid part of the British Empire, oceans on both sides, the Arctic on the north, the United States on the south, no near enemies, unlimited possibilities. The day may come, and probably will, when Canada will be the real British Empire, with London for its European headquarters.—Chicago Herald and Examiner.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of bile into your bowels daily. If this bile is not poured out, it gets thick and it just clogs up the bowels. Gas builds up and you feel uncomfortable. You feel sick, you feel tired, you feel old. A more bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel like a new man. They do the work of a hundred but have no poison or irritant in them. Ask for Carter's Little Liver Pills by name! Absolutely refuse anything else. 50c

Good Habit To Cultivate

Children Should Be Taught Kindness To Dumb Creatures

Victor Hugo says of that bishop whom all readers of "Les Misérables" will never forget, "He sprained his ankle once trying to avoid stepping on an ant." He belonged to the order of those who would not "needlessly set foot upon a worm." This attitude toward life, even when we meet it in its lowliest forms, can be cultivated in children if parents start early enough. If there are harmful creatures whose meaning we cannot understand and which must be destroyed, let the destruction be without unnecessary suffering and never in the spirit of cruelty.—Our Dumb Animals.

First Canadian Telegraph

Company Was Formed At Toronto Ninety Years Ago

Ninety years ago the first telegraph company in Canada was formed at Toronto and within a few days active construction upon the pioneer wire line between Toronto and Hamilton was commenced. In January the line was completed to Queenston. The same year the Montreal Telegraph Company established communication between Montreal and Toronto and, in 1852, purchased the initial Toronto company.

Presents Family Cradle

The cradle bought at Morley, Eng., 84 years ago for Herbert Henry Asquith, early war premier who became Lord Oxford and Asquith, has been presented to Morley by Henry Asquith, one of three generations of the family who have used the cradle, his father and his own daughter having been rocked in it. The gift has been accepted by the mayor.

World Jewish Problem

The Jewish Population Of Poland Is 3,500,000.

The world Jewish problem took on new complications at Geneva with a Polish demand that the League of Nations find a home somewhere else for the Polish Jews.

M. Komarnicki, the Polish delegate, told the League assembly's political committee that while Palestine was the natural and principal home for the Jews, other places must be found as an asylum for the "immense reservoir of Jewish population inhabiting Central and Eastern Europe."

The Jewish population of Poland is 3,500,000.

The government moved at Jerusalem to end sabotage by arresting 38 Arabs and securing 15 more of damaging the Iraq Petroleum Company pipeline. Brigands have been continually destroyed sections of the pipeline and fired the escaping oil.

SELECTED RECIPES

MAGGI CREAM COOKIES

2 eggs
1 cup sugar
1 cup thick cream
3 cups flour
¼ cup shredded coconut
½ teaspoon Magic Baking Powder
½ teaspoon salt

Beat eggs until light, add sugar gradually; add coconut, cream, and flour (which has been mixed and sifted with baking powder and salt). Put away in ice box until thoroughly chilled, then turn on to a flour board and roll one half inch thick. Sprinkle with coconut and roll one fourth inch thick; cut with a small cutter, stir dipped in flour. Bake on a buttered sheet in a moderate oven.

Fighting Planes For Canada

Royal Canadian Air Force Receiving Equipment From England

The Royal Canadian Air Force now is receiving new equipment recently purchased in England at a total cost of more than \$500,000. Two of seven Shark bombing planes have arrived and are now being assembled at the Rockcliffe airdrome and the other five are on the way. These machines cost \$45,000 each.

The bombers might be said to be the first real war machines bought by Canada since the Great War. They are the latest type of fighting machine and similar to many purchased by the British government recently. With a maximum speed of 175 miles per hour they are capable of staying seven hours in the air.

In addition to the bombers 10 planes are being made for the force at Fort Belvoir, Ont., at a cost of about \$40,000 each. They will be used for training of beginners in the force.

Cause Of Cataracts Unknown

Certain Food Extracts Said To Have Effect On Eye Manifold

The cause of cataracts, which has baffled the medical world for centuries, was believed to be a step nearer solution with the discovery by Dr. Agnes Fay Morgan, chairman of the department of household science at the University of California; and Beattie B. Cook, a graduate student, that certain food extracts have a material effect on the eye malady.

In a report to the society for experimental biology, Dr. Morgan said her experiments showed that presence of lactose or galactose in the intestine, and frequent gastro-intestinal absorption difficulties associated with a deficiency of vitamin G offer a possible common attack on the problem.

"In lactose and low vitamin G diet tests, there was a hundred per cent. incidence of cataract," the report said. "Likewise the lactose fed controls grew at about 60 per cent. of a group of cornstarch fed controls."

Dr. Morgan said the cause of cataracts is still unknown but that the determination of the cause has moved a step in advance in the possible future prevention of the disorder.

Girl Pat Escapee

Skipper And His Brother Convicted In Old Bailey Court

George Osborne, skipper of the wandering trawler, Girl Pat, and his brother, James, were convicted in Old Bailey court in London of theft of the vessel. George was sentenced to 18 months in prison and James, formerly of Toronto, to 12 months. The Girl Pat put out from Grimsby by last April, ostensibly on a fishing expedition. She put in along the Spanish coast, at the Canary Islands, and in West Africa. She was next reported off French Guiana and finally was captured in June off British Guiana.

Tourist Traffic Shows Advance In Mountain Parks Of British Columbia

Motor tourist traffic to the National Parks of Canada for the six-month period ended September 30, 1936, showed an increase of 14 per cent. over figures for the corresponding period in 1935, according to a statement issued by the Hon. T. A. Cresser, Minister of the Interior, where a record of motor travel is maintained, disclosed gratifying gains over last season.

A remarkable advance was registered in the mountain parks of British Columbia, where Kootenay's total of 44,656 visiting motorists represented a gain of 29 per cent. over 1935. Registrations in Yoho Park which totalled 17,474 persons reflected an increase of 30 per cent. over the previous season.

Of Alberta's National Park, Banff and Waterton Lakes showed the greatest gains. Motor registrations at the eastern gateway to Banff Park totalled 118,247 against 91,602 for 1935, a gain of 29 per cent., and traffic to Waterton Lakes Park advanced from 47,777 to 58,546, an increase of 23 per cent. Motor traffic to Jasper Park increased 50 per cent. to 8,381 and a slight gain was recorded at Elk Island Park where 42,832 persons were counted. Attendance at Buffalo Park declined slightly from last season, the figures for the six-month period totalling 8,440.

Saskatchewan's national playground, Prince Albert Park, experienced an increased flow of tourist traffic, with the total of 24,271 visitors representing a net gain of 30 per cent. Riding Mountain National Park in Manitoba with 94,627 visitors to September 30, is well ahead of the total for the same period in 1935 and promises to exceed the record of 100,038 established for the whole season of 1934.

Of all the National Parks, Point Pelee Park in southwestern Ontario received the greatest number of visitors, where 260,140 motorists set a new all-time record for this popular recreational area.

Electric Plough Used In England

Used On Farm In England For The Past Twelve Years

Electric ploughing was one of the subjects dealt with at the recent World Power Conference held at Washington, U.S.A., and mention was made of the only electric plough in England which has been in use for the past 12 years on a farm in East Grinstead. The equipment consists of a two-wheeled carriage, upon which is mounted a 12 h.p. motor, complete with starting switch and speed reduction gear, and two cable drums, any of which can be driven at will by means of the motor.

The equipment is anchored in a convenient position in the field and adjacent to the overhead lines which supply the power. The set operates on the roundabout haulage system. A double-furrow anti-balance plough is used, being drawn to and from across the field by a steel rope attached to the drums on the carriage. The speed of ploughing is from one-third to one acre per hour, varying with the nature of the soil and depth of furrow ploughed. Five acres a day is the average with such a small set.

Coronation Colors

Red And Blue Are Given Royal Approval

Red and blue have been chosen for popular dress at the coronation of King Edward VIII. next year.

Royal approval has been given to two particular shades of each of the colors chosen from thirty hues of each. The selected shades will be called "coronation red" and "coronation blue."

The red is between magenta and scarlet and the blue between royal blue and lido.

London ladies are flocking already to shops to buy the proper shade.

American people pay more in federal, state, and local taxes than they do for food, rent, clothing, and other living expenses.

Modern Pied Pipers

Scientists Faced With Necessity Of Exterminating Rodents

Modern Pied Pipers are two scientists who left Honolulu recently to fly 2,500 miles across the Pacific to Wake Island to kill rats.

Faced with the necessity of exterminating rodents on Wake before inaugurating passenger service to the Orient, Pan American Airways secured the federal government's cooperation in sending scientists to supervise the job.

Armed with traps, guns and poisons instead of a flute, Henry K. Spencer, biologist with the U.S. experiment station in Honolulu and H. G. Hansen, member of the U.S. biological survey in Hawaii, drew the assignment.

Wake actually is comprised of three tiny islands—Wake, Peale and Wilkes—enclosed by a coral lagoon, 2,500 miles due west of Honolulu. On Peale, Pan American has built its air base, three stepping stones on the route to Manila, and here the rats cavort. They eat everything available, even gnawing through heavy canvas, boxes and crates to fish food supplies.

Thousands of them, descendants of rats who "hitch hiked" to Wake during ancient Polynesian migrations, overrun the three islands. They reproduce faster than men can shoot them; they are smart enough to dodge ordinary traps after the first few hundred have been caught.

Soil Is Wearing Out

Conservation Is Necessary In Canada To Ensure Good Crops

In parts of Europe where soils have been tilled for a thousand years or more yields are increasing while here in Canada, on what is almost virgin soil, comparatively speaking, our yields are quite unsatisfactory.

Most of our soils have been cultivated for many years, and unsatisfactory crops are blamed on the weather, on the seed used, on late or early seeding as the case may be, and we quite overlook the fact that probably the real cause is soil exhaustion. Our soils are wearing out.

Moreover, soil deficiency may manifest itself in live stock through lack of thrift, lack of resistance to disease, depraved appetite and in other forms which we sometimes attribute to just plain cussedness.

We might as well admit that plant food in the soil is not inexhaustible and that we cannot continue taking potash, phosphate, nitrogen and lime out of our land without putting any back and expect to go on growing good crops indefinitely and keeping our live stock healthy and vigorous.

Soils require intelligent treatment, and now that science has come to our aid with quick practical soil tests there is no reason why we should longer continue to ignore the subject of soil conservation which is so fundamental to successful agriculture.—Farmer's Advocate.

Must Be Given Chance

Advertising Only Once Is Poor Way To Get Results

Suppose you threw a stone at a mark and missed it, what would you say? Would you say that there was no mark to hit, or that it couldn't be hit, or that the stone was so misshapen that it would not carry true to aim? Or would you be candid say that the failure was due to your own lack of skill? And if you really wanted to hit the mark, would you make but a single throw? Would you not keep on trying until you hit the mark—probably as a consequence of improved skill in throwing stones?

Yet there are men who use advertising but once, and who, when the hoped-for results are not instantly obtained, declare that advertising is no good, or that the medium is no good.—J. C. Kirkwood, in Marketing.

Magistrates in Shantung Province, China, will in future get a salary of \$6.75 a month.

Displacing The Busy Bee

Man Attempting To Take Over Job Of Pollination

Middle-aged man is constantly trying something to throw the old order out of better. We have always liked that simile "busy as a bee," but the time may come when it will have to be relegated to the limbo of forgotten things simply because it has become obsolete.

Bees, as every schoolboy knows, perform a two-fold service in the natural scheme of things. The little insects carry on pollination as they go from blossom to blossom in quest of nectar. Of course, the wind carries pollen, too, but the bees seem to make a better job of it.

Now man is making a brazen attempt to make the bees feel that they are no longer needed to assist in pollination. According to the New York Sun, orchardists in Wenatchee, Washington, this spring, under the supervision of the Washington State College extension service, pollinated apple trees by hand; in nearly every instance the apple set was almost doubled. Blossoms from pollinating varieties of trees were rubbed on screens, causing the pollen to drop through upon a piece of paper. After being allowed to dry for 48 hours the accumulated pollen was placed in a bottle. Then the workers, equipped with small brushes, touched one blossom in every second, third or fourth cluster with a tiny particle of pollen.

One limb dependent on bee pollination was used as a check. It contained 137 bloom clusters; of these only seven blossoms set, producing seven apples. Another nearby limb had 93 clusters; one bloom in each cluster was pollinated by hand and 87 apples were produced, weighing the harvest to the ground. Hand pollination, where trees are healthy and crops light, provided that the task is well performed. They believe the process promises to be cheaper than the annual shipping of millions of bees into the district.

Livestock On Prairies

Census Shows Fewer Horses And Hogs But More Cattle

Small reductions were reported in the number of horses, cattle and sheep on Canadian farms, by the Dominion Bureau of Statistics as of June 1 last compared with the same date a year ago. The number of hogs, however, increased by 23 per cent.

The census return for the three prairie provinces showed a comparison with the last census five years ago. In all three provinces the number of cattle increased in the five years while the number of horses, hogs and poultry decreased. The number of sheep increased in Saskatchewan but decreased in Manitoba and Alberta.

Water freezes every night of the year at Alto Curcurin in Bolivia, while at noon the sun is hot enough to blister the skin.

Woman From Scotland The Unsung Heroine of a Most Amazing Household

Reward Would Be Proper

For Canadian Farmers Who Consistently Produce Good Bacon

Quality is essential, but of equal importance in our bacon trade with Britain is dependability and continuity of supply. The grower who consistently maintains one sow or two, striving always to improve the quality, is making a far greater contribution than the in-and-outer who one year takes out ten litters of pigs and the next year none at all. It would be quite proper if some system of reward or compensation could be instituted for those who carry on with steadiness of purpose and with continuity of production.

Canadian farmers have been obliged in the past to think very little about marketing, and were thus able to concentrate largely on production. Now since the nations have all become jittery and have adopted the policy of self-sufficiency, marketing is a real problem for the government and for the farmers themselves. We must of necessity become market conscious and plan our operations with markets in mind as well as yields.

Latterly hogs have been the best paying live stock on the farm, and there has been what amounts to an unlimited market for the product. In spite of that our swine production record during the past five years has been nothing to boast about. A great opportunity has been lost!

Has A Unique Display

Provincial Public School Exhibition Attracts Large Crowds

A unique display, "The Evolution of Making a Bed," entered at Nova Scotia provincial exhibition by children of the Dartmouth public school, attracted considerable attention from patrons of the show at Halifax.

The display consists of a number of drawings contributed by children from grades one to eight. "The idea," Supervisor of Dartmouth Schools G. C. Beazley explained, "is not to judge the display by the individual drawings but by the development by grades."

"The work of the first grade pupil is sometimes more haphazard to indicate the bed. One can almost see the mind of the pupil developing with the drawings as the work of the succeeding classes reveals their ability to illustrate the desired idea. In the final stage the work is of high character."

Mr. Beazley got the idea for the display while visiting Scotland last year.

Bolivia ranks second in world production of tin, producing about one-fifth of the total supply.

Toys For Tots Are Fun To Make

Household Arts by Alice Brooks

Two Pieces Form Each Toy

PATTERN 5723

Establish your reputation with these simple toys. Donate them to the Fair—they'll sell like hot cakes! Give them to some lot for Xmas—they'll melt with instant popularity! You'll enjoy making them, too, for they're but two pieces joined. You can make them inexpensively, of bits of left-over material, they need no little! In pattern 5723 you will find a pattern for the animals shown; directions for splicing them and material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

The eyes through which Helen Keller, the famous blind woman, sees the world, are now revealed.

The story is that of a Scottish woman who for 14 years had to see everything she looked at in three different ways. Now that woman is Miss Polly Thompson. Miss Keller's secretary—mead see only twice, for Mrs. Anne Sullivan Macy, Miss Keller's teacher, died recently.

Until Mrs. Macy's death, the woman from the Scottish Highlands was an unsung heroine of one of history's most amazing households. For a decade and a half she buried her identity in the task of serving as eyes for the blind and deaf Miss Keller, and for the virtually blind teacher who led Miss Keller to international fame.

While she lived, the teacher held the spotlight for her accomplishment in teaching Miss Keller to speak, and to "hear" through her hands.

However, it was not Mrs. Macy, great though her contribution was, but Miss Thompson through whom Miss Keller saw life almost as clearly as though the eyes were her own.

To keep her employer abreast of current events, Miss Thompson maintained a household on lines astonishingly close to normal.

The mere fact her companions could not see did not prevent their reading their favorite newspaper at breakfast every morning. Propping it up, the secretary would read as she served the meal. Mrs. Macy, who could hear, would hold Miss Keller's hand and relay the news to her in fingertip "writing." Miss Keller would comment on her sublime voice and discussion would pass from hand to hand.

If the news were particularly interesting, the three would retire to the living-room and talk it over in detail.

After that, on an average day, would come the sorting of the mail. More often than not, Miss Keller would have a speech or piece of some sort to write for aid to the blind. While she went to the third floor to write it, finding her own way to her study, Miss Thompson would go through the incoming envelopes.

If there was an urgent letter, the secretary would stamp her foot on the floor. Miss Keller would feel the vibration upstairs, and hurry down to compose an answer.

When evening came, there was entertainment to think of. They might stay home and listen to the radio, with Miss Thompson "writing" the broadcast in Miss Keller's palm. If there was music, Miss Keller's fingers would rest on the loudspeaker to pick up vibration.

They went to movies, too, and plays. Miss Keller saw the scenes as they flickered on and off the screen, thanks again to her secretary's nimble fingers. If Mrs. Macy went along, the relay worked again.

It was because of Mrs. Macy's failing eyesight that the 29-year-old woman from Glasgow became Miss Keller's secretary.

Patriotic Corn Developed

Ears Had Stripes Of Red, White And Blue Kernels

Patriotic corn—red, white and blue—was harvested the fall at the Connecticut Agricultural Experiment Station in New Haven, Conn.

Relating how it was developed, Dr. W. R. Singleton said it might be described as "a piece of scientific nonsense."

Dr. Singleton said he divided the silks on a white stock into three parts. He powdered one part with pollen from a red-kernelled plant, pollinated the second with blue and the third with white. Then he covered the silks carefully to prevent contamination by other pollen.

The result at harvest: Ears with stripes of red, white and blue kernels.

Confucius is not a Chinese name. It is the westernized, or Latinized, version of "K'ung F'ang," a Chinese phrase meaning "The philosopher, or master, K'ung." K'ung was his clan, or family name.

WORLD HAPPENINGS
BRIEFLY TOLD

Death rate from tuberculosis has been cut in two in Ontario, Hon. Dr. J. A. Faulkner, Ontario minister of health, told a Peterborough service club.

A claw for the front of police automobiles has been invented by a famous English automobile racing driver to aid in the capture of criminals fleeing in cars.

A machine that tests 3,000 eggs an hour for quality and grades them by weight was on show recently at the Grocers' Exhibition at Royal Agricultural Hall in London.

Thomas Bryson, 93, the oldest foreign missionary in China, died at Tientsin recently. He went to China from Edinburgh in 1866 in a tea clipper which required 150 days to make the voyage.

Word reached Yorkton to the effect that Dr. Jos. Heaslip, who at one time in his career practiced medicine there and in Manville, Alta., has been appointed medical officer in the Guelph, Ont., reformatory.

Officials of the Northern Alberta railways estimated that 3,500,000 bushels of grain, mostly wheat and with an estimated value of \$2,500,000 had been marketed already this season by farmers in northern Alberta.

Just 145 years ago a man who couldn't sleep nights sent \$5 to the United States treasury. Since then many remorseful citizens have followed his example, until to-day the treasury ledgers showed \$624,113.70, all credit to the people's conscience.

Application of the Central Alberta Dairy Pool, Limited, and the Sunny Alberta Creameries, Limited, for a reduction in the freight rates on butter in carloads from Alis, Alta., and Red Deer, Alta., to Vancouver was dismissed in a judgment of the Board of Railway commissioners.

New Garden Methods

Scientists Predict That Vegetables Can Be Grown in Chemical

A world of tomorrow in which families will raise their own vegetables from chemical tanks instead of gardens, getting a year's supply at the present monthly cost, was visualized by Arthur C. Pillsbury, scientist.

Pillsbury, also a naturalist, inventor, explorer, author and lecturer, said soil-less tank experiments had indicated a tenfold increase in vegetable production.

"Although the idea is not new, recent experiments have led scientists to believe that vegetables can be grown commercially in shallow tanks, partly filled with water, in which all the necessary soil requirements have been mixed," Pillsbury said.

"In one instance shallow-tank-grown potatoes produced between two and three thousand bushels to the acre compared with a United States average of 104 bushels."

Head Clerk: "What's the matter, Jockins? Can't you help the customer?"

Clerk (desperately): "No, sir, He's trying to find two shoes that squeak in the same key."

A skilled "animator" is said to maintain an excellent average if he turns out from five to eight feet of animated cartoons in a day.

Inventions Of The Future

Experts Have Visions Of Cornucop
Equipped With Zippers

Speculating on the wonders of the future, United States government experts who spend their time examining agricultural patents have envisioned:

Corn on the cob equipped with zippers; bananas flourishing in Maine; grapefruit that automatically squeezes itself; seeds that, planted before breakfast, produce ripe vegetables for dinner, and trees that spring from acorns in a year.

"All of these fancies seem impossible at present," said a patent office statement, "but not necessarily any more so than the aeroplane or radio would have seemed to the examiners on 1896 when the present system (of industrial patents) was established."

Patents on plants were legalized six years ago and have multiplied like garden weeds in spring rains. More than 1,000 applications have been received for patents on vegetables, fruits, flowers and trees.

Approximately 200 have been issued for such things as raspberries, carnations, grass for golf greens and water lilies.

Predicts World War

Visitor Looks For Hostilities Within Two Years

Another world war within two years was predicted by Emil Ludwig, German-Jewish biographer, who arrived from South America with his wife.

Asked if he meant conflict between Fascist and Communist nations, Ludwig waved a hand, waved away the political labels.

"It is no longer Communism and Fascist," he said. "You have so much of state Socialism in Berlin and Rome that one can no longer use the differentiating terms."

"No war will come because there are two conflicting philosophies in the world. It will come just as it did in the days of the religious wars in Europe. It will come because there are the aggressive and defensive nations. They will fight."

Prison Reform

Canadian Penal System Under One Authority Is Suggested

Centralization of the Canadian penal system under one authority was suggested in a brief submitted by the Halifax branch of the Prisoners' Welfare Association to the royal commission investigating penal conditions.

The association recommended reduction of minimum sentence to the penitentiary from two years to one. There should be application of the League of Nations standard minimum rules in provincial and municipal as well as federal penal institutions, the brief said.

It suggested limiting to 500 the number of convicts in any penitentiary; graduation of status of penitentiaries; visiting committees with advisory functions and technical training for prison officials.

Nurses Contract Tuberculosis

Thirty Cases Discovered Among Nurses in Training In Ontario

Thirty cases of active tuberculosis were discovered among Ontario nurses in training in medical examinations conducted a year ago by the province, Hon. J. L. Simpson, Ontario minister of education, said in an address before the Ontario Hospital Association at Toronto. In the last two years 22 training school teachers were found to be victims of active tuberculosis, he said.

Crashing into the Solent and tearing off his plane undercarriage, a Royal Air Force pilot managed to clear and make a perfect landing unscathed at the aerodrome in Gosport, England.

Have Great Many Uses

Old Automobile Tires Come In Handy Around The Farm

Old automobile tires play an important part in Australia's farming life. They are reincarnated into an endless variety of useful objects.

There is hardly a farm in central Australia which does not possess its old-tire stock ready for transformation by its resourceful owners. The men make "bow-yangs" from circular strips from inner tubes. These are worn around the trousers, below the knee, in approved bush fashion, to keep out dust from the plow, and are becoming popular with the girls who use them for garters—suitably covered with colored ribbons. Some farmers find that sections cut from a tire make excellent brake leathers for their carts.

Old tires are almost universally used to resole boots. Braces, belts and even handbags made of inner tube are considered correct in the "outbreak," and almost everlasting leggings are also made from them.

Inner tubes also prove handy for making collapsible buckets, and rifle cases. They are also invaluable as water-tight carriers for carrying the mail from the letter boxes, which are often as much as a quarter of a mile away from the farm buildings in Australia, in a rain storm.

Scientist Has New Theory

Believes Rust Will Some Day End All Life On Earth

A leading man of science says the earth may one day rust to death, ending all life on the planet.

Writing for the Smithsonian Institute, Dr. Henry Norris Russell described how the air's oxygen is slowly depleted by oxidizing (rusting) of iron in rocks.

"Given time enough," he said, "this inexorable process of rock decay might exhaust the remaining oxygen of our atmosphere and put an end to all that breathes."

Dr. Russell figured the end would not arrive for a billion years or more.

Quickly Knitted in Stockinette Stitch

Household
Arts
by
Alice
Brooks

An
Exclusive
Model
in
Knitting

PATTERN 5718

Gloriously young and wearable is this two-piece of Alice Brooks design. Knitted so easily of sports yarn or string, the blouse finishes its neckline with a softly twisted collar, and boasts a front trim of alternate light diamond and stripes. Rib stitch makes snugly fitting cuffs and the smooth, hug-me-tight peplum. You can make the blouse with long or short sleeves. In pattern 5718 you will find instructions for making the blouse and skirt in sizes 12-18 and 38-40; an illustration of the blouse and of all stitches used; material requirements.

To obtain this pattern send 50 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 178 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

SUNDAY SCHOOL LESSON

NOVEMBER 8

THE CHRISTIAN WARFARE

Golden text: Be strong in the Lord, and in the strength of his might. Ephesians 6:10.

Lesson: Acts 19; Ephesians 6:10-21. Devotional reading: II. Corinthians 1:3-11.

Explanations And Comments

The Christian Warfare, Ephesians 6:10-12. To be a Christian is to be a soldier engaged in warfare against evil, and the strength for the fight comes from God. To be victorious the Christian must put on the whole armor of God, all that God provides for his overcoming, there must be no part lacking. It is not with mere man that we have to contend, Paul asserts; our antagonists are principalities, powers, world-rulers of darkness, spiritual hosts of wickedness in heavenly places.

The Equipment of the Christian Soldier, Ephesians 6:13-18. "The days are evil," Paul has said in 5:16; now he counsels his readers to withstand "in the evil day" by taking up the whole armor of God. Paul refers to the whole earthly pilgrimage as an evil time that demands constant, vigilant fighting. Stand therefore! Stubborn, unwavering resistance will win battle. Nothing short of the whole armor will suffice in this conflict.

In addition, you must take up the shield of faith, that is, a strong trust in God's protecting and saving grace, wherewith you shall be able to quench all the fiery darts of the evil one.

And take the helmet of salvation. "The assurance that we are now saved and are being kept by the power of God will be our sure protection, like the gleaming crested helmet which covered the head of the triumphant warrior. All this spiritual armor mentioned by the apostle was for purposes of defense. The one weapon of offense he now names. It will suffice. There is need of no other. It is the sword of the Spirit, which is the word of God. The gospel message placed in the hands of the Christian warrior shall be firmly grasped and used with skill. All the truth revealed in Christ will be of priceless value in the spiritual conflict" (C. R. Erdman).

But all the equipment mentioned is not enough, it must be reinforced by prayer, vigilant, persistent prayer. The greatest thing anybody can do is to pray. It is not the only thing, but it is the chief thing. When the

If You Have
a Child

ASK YOUR DOCTOR THIS

Ask Him Before Giving Your Child an Unknown Remedy

Practically any doctor you ask will warn: "Don't give your child unknown remedies without asking your doctor first."

When it comes to the widely used children's remedy—"milk of magnesia," the standard of the world is established. For over half a century many doctors have said "PHILLIPS' Milk of Magnesia." Safe for children. No other is "quite like it."

Keep this in mind, and say "PHILLIPS' MILK OF MAGNESIA," when you buy. Now also in tablet form. Get the form you prefer. But see that what you get is labeled "Genuine Phillips' Milk of Magnesia."

ALSO IN TABLET FORM: Back tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

MADE IN CANADA

PHILLIPS' MILK OF MAGNESIA

Holy Spirit touches a man's heart and life anew, he always breathes soft, burning passion into his heart—he draws a man aside into the prayer-place, the secret place of his life in touch with God. And he leads a man to find out this, that all the rest of the life grows out of prayer—the serving and the doing, all we are and all we attempt to do, grow out of touch with God" (S. D. Gordon).

Things might get better, too, if we gave less thought to what the world owes us, and more to what we owe the world.

Premiums amounting to around \$150,000,000 pour into Lloyd's of London in the course of a year.

Some people can't stand prosperity and some can't even get a chance to try.

Warchouses at Calgary, Edmonton, Regina and Winnipeg

MADRID BEGINS THE RATIONING OF FOOD SUPPLIES

Madrid.—Besieged and swarming with ragged, hopeless refugees, Madrid began rigorous rationing of food to feed 1,500,000 mouths.

The civil governor announced an emergency provisioning committee, working day and night, was prepared to dole out sustenance to the populace. Thousands of homeless wanderers, stranded by the civil war, roamed Madrid adding to confusion of the capital as the government openly admitted its desperate plight.

The cabinet, in emergency session to solidify defence operations, ordered compulsory billeting for war refugees who, they feared, were a menace to order.

With the city's normal population of more than 1,000,000 greatly swollen the government was alarmed looting and food riots might add to the tremendous task it faces in conserving and mobilizing its resources.

A war ministry bulletin admitted government reverses on all the fronts surrounding Madrid except at Talavera where, it said, Madrid war planes bombed the insurgent airport.

It was said the capital had sufficient food supplies to resist an absolute siege for at least two months.

A despatch reaching Paris from the Spanish battlefield said that Fascist war plane pilots, after observation of all fronts, reported the Socialist government had withdrawn its main forces to the suburbs of the capital itself.

At Navalcarnero the insurgent command drew up plans for a drive into Madrid.

With their outposts 10 miles from the capital—almost within range of their heaviest artillery—the Fascist leaders laid out a careful strategy. They relied principally on a fleet of 200 swift, tiny tanks and armored cars to charge into Madrid's streets ahead of infantry, if necessary, to follow up their projected bombardment of the capital with big guns.

At El Escorial, 4,000 untrained Madrid militiamen fought valiantly but hopelessly to repulse the Fascist's steady advance. The Fascists outmanoeuvred the government troops at every turn. By dawn they had virtually captured the village of Peguerinos, on the front west of Madrid, almost without expending a man.

In Istanbul Maritime Records disclosed the Soviet ships Blagoev, Kurak, Skiroff and Stifanoff, loaded with foodstuffs, planes and war material, had passed through the Bosphorus, their destination Spain.

At Lisbon the Portuguese government officially denied reports that it planned to recognize the Spanish insurgent provisional government.

More Recruits Needed

British Youths Must Be Given Military Training

London.—British youths between the ages of 14 and 18 years must be given military training, War Secretary Alfred Duff Cooper said at a luncheon here.

Attacking persons opposed to new British defence plans, he said they were obliged to admit their policy would involve forcing the country to give way before any stronger nation. "The necessity of obtaining men," the war secretary said, "is, I think, the most urgent with which we are faced at the present time."

Another Complaint Made

Seattle.—Frank Bell, United States fisheries commissioner, declared Japanese fishermen, working in sampans off six big floating canneries, are threatening the existence of Alaska salmon. British Columbia fisheries authorities recently made similar complaints about Japanese operating at sea off the British Columbia coast.

Recovering From Operation

London.—Obed Smith, formerly chief emigration commissioner for Canada in London, is recovering from two serious operations. He was reported doing well.

Debt Conversion

Quebec House Passes Measure Sponsored By Provincial Treasurer

Quebec.—Conversion of part if not the entire debt of the province of Quebec was authorized in a measure sponsored by Provincial Treasurer Martin B. Fisher and adopted on division by the Quebec legislature.

The measure did not mean the government would immediately convert the provincial debt, Premier Maurice Duplessis said in explaining the bill. He said it gave the government power to do so if desired and at the same time enabled it to secure advantage of lower money rates.

The bill had a three-fold purpose, said the premier. The legislation first authorized the lieutenant-governor-in-council to change the form of any part of the existing public debt of the province by substituting one class of securities for another, provided the capital of the debt is not increased.

Provision was made, the premier asserted, that no such substitution could be effected without the consent of the holder or unless the security is redeemed by the government.

Under limits of the bill, loans are restricted to a term not exceeding 30 years, and an interest rate not exceeding four per cent.

Defends Capitalistic System

Speaker Claims It Allows Greatest Opportunity For Human Progress

Saskatoon.—Spirited defence of the capitalistic system as allowing the greatest opportunity for human progress, a still higher standard of living and a greater measure of security was made by H. J. Child, chairman of the Montreal Stock Exchange, in a Canadian Club address here. He offered democracy, freedom of the individual from state control, a recognition by business leaders as well as employees of their respective rights and duties, and understanding as allowing the best measure of expansion.

"We cannot escape the conclusion that our system of government and political economy arose not because of any specific plan which men appreciated, but because it was the only system under which we could expand in accord with the economic necessity of a new country," he declared. "It has been demonstrated in many instances that free enterprise, operating under democratic institutions, is the only system capable of providing abundance. Any other system has brought in its wake misery and suffering in a degree which would shock the peoples of this country."

New Leader

Saskatchewan Conservatives Select J. G. Diefenbaker At Regina Meeting

Regina.—Saskatchewan Conservatives named J. G. Diefenbaker, K.C., 40-year-old Prince Albert barrister, their provincial party leader.

One of the youngest to be named leader to the Conservative party in Saskatchewan, Mr. Diefenbaker replaces at the head of his party Dr. J. T. M. Anderson, Saskatoon, former premier, whose resignation was received by the convention in Regina city hall.

Would Amend Criminal Code

Montreal Judge Thinks Time Has Come For Reform

Montreal.—The time has come, Judge Amédée Monét believes, for amendments to the Criminal Code. "Very often the law is the judge, and not the judge sitting on the bench in certain cases," he said. The Criminal Code calls for a sentence of not less than three years in penitentiary for a man convicted of stealing 25 cents from a letter, yet provides a sentence of not more than three years for defrauding a widow of her last \$10,000.

Valuable Wheat Shipments

Edmonton.—Officials of the Northern Alberta railways estimated here that 3,500,000 bushels of grain, mostly wheat and with an estimated value of \$2,500,000 had been marketed already this season by farmers in northern Alberta.

HON. ARTHUR ROEBUCK

Attorney-General of Ontario, who has left for England to appear in the appeal being carried to the Privy Council by the Federal and some of the Provincial Governments on social legislation.

Would Aid Spanish

British Labor Party Says Help Should Be Given

London.—The Labor party and the trades union council, in joint session, decided aid should be given the Spanish government in the civil war with the Fascists insurgents.

The decision represented a change in the stand of the Labor party, which voted at its annual conference early this month to support the government in its non-intervention stand.

A resolution passed at the joint conference said the right of the constitutionally-elected government of Spain to secure the means necessary to uphold its authority and enforce law and order in Spanish territory must be re-established.

The conference decided to call upon the British government in collaboration with the French government, immediately, to take the initiative in promoting an international arrangement completely to restore to Spain full commercial rights, including the purchase of munitions.

Russians Sent To Jail

Film Trust Executives Convicted Of Wasting State Money

Moscow.—Three executives who "went Hollywood" in Russia were sentenced to labor camps. The men, former executives of the Film Trust, were convicted of frittering away state money for the production of movies.

The manager was sentenced to serve four years, the director to two years and a bookkeeper to one.

The accused men were charged with purchasing a bad scenario, countenancing excessive production expense, and with wasting money searching for talent.

BRITAIN LAUNCHES NEW SUBMARINE

Launching of H.M. Submarine "Sunfish" at the Chatham dockyard, where the naming ceremony was performed by Mrs. Skipwith, wife of Vice-Admiral H. M. d'E. Skipwith.

Belgian Fascists

Want Belgium To Withdraw From League Of Nations

Brussels.—Belgian Fascists and Flemish Nationalists, opponents of Premier Paul Van Zeeland's government, demanded that Belgium announce its withdrawal from the League of Nations.

Their proposal came after a speech by Foreign Minister Paul Henry Spaak which those groups contended was a recession from the "neutrality" policy recently pronounced by King Leopold.

Spaak described Belgium's new foreign policy as "complete independence without returning to our pre-war foundation of complete neutrality." It could not be adhered to, he asserted, unless parliament provided extraordinary appropriations for military expenses.

The Rexists, a Fascist organization headed by Leon Degrelle, called the "Hittler of Belgium," and the Flemish Nationalists, whose sympathies are strongly pro-German, declared Spaak had back-tracked on the king's statement, the nation should refrain from collective security and the army should be reorganized only for protecting Belgium from invaders.

How Wars Are Won

Does Not Think That Next War Will Be Fought In The Air

Chicago.—The next war, General Frank Parker, retired, predicted, "will begin in the mud and end in the mud, despite claims made by proponents of military aviation."

The general, who ended 46 years of United States army service last Sept. 30, was unimpressed by the theory that the next conflict would be fought in the air. He was unmoved by stories of death rays and virulent new poison gases.

"We who have studied military tactics know that wars are won by capturing and holding territory. For this purpose nothing has yet been devised to supersede infantry supported by artillery," he said.

Unemployment In Alberta

Calgary.—For the week ended Oct. 24, the number of unemployed men and women in Alberta totalled 11,306, a new record, the Alberta government employment service reported. It was an increase of 32 per cent. as compared with the same week a year ago. Calgary had a total of 5,054 registered unemployed; Edmonton 4,462, and Lethbridge 465.

Would Develop Trade

Adelaide.—Hope that trade between Canada and Australia would be developed to the greatest extent possible was voiced by Hon. R. B. Bennett, Canadian Conservative leader. He was speaking in response to a toast at the Commonwealth Club luncheon.

ARE ACQUITTED OF VIOLATIONS OF AGREEMENT

London.—The international "hands-off-Spain" committee acquitted both Italy and Portugal of charges of violation of the non-intervention agreement despite strenuous Russian objections.

Three separate votes on the various charges were taken and in each case the "acquittal" was unanimous except for Russia's dissent.

The Earl of Plymouth, chairman of the committee, took the initiative before the body and said the charges against Italy that she had supplied arms and munitions to Spanish Fascists, either:

1. Referred to what happened before the agreement went into effect, or;
2. Had not been proved; or
3. Were not violations.

The three votes were taken on: 1. Italy's reply to charges by Russia she had supplied war materials to the insurgents in Spain; 2. Charges by the Spanish government against Portugal that she had aided the insurgents;

3. Russian allegations charging both Portugal and Italy with sending in arms and ammunition.

These developments within the committee in its lengthy sessions were disclosed in a communique.

The communique also disclosed the Portuguese representatives on the committee declined to accept Russia's proposal for control of Portuguese ports by naval vessels of one or more of the member nations of the committee.

Ivan Maisky, Russian ambassador to London, told the committee Russia would combine its control proposal with a proposal made by Lord Plymouth for control of Spanish ports and frontiers to see the non-intervention agreement was observed.

These proposals, the communique said, will be referred back by the various diplomats on the committee to their home governments.

German and Italian representatives insisted they were anxious to make the agreement effective and indicated their governments would approve, but they said the proposals must be studied.

More Money On Prairies

Survey Shows Purchases Were Higher During Last Year

Ottawa.—People on the prairies had more money to spend last year than in either of the two previous years, according to a survey by the Dominion bureau of statistics which shows retail sales in the three prairie provinces amounted to almost \$385,000,000 in 1935. This was six per cent. higher than in 1934 and 16 per cent. above 1933.

Percentage increase was about the same for all. Here is how the three provinces compared, with 1934 figures in brackets: Manitoba \$137,538,000 (\$129,847,000); Saskatchewan \$119,137,000 (\$111,637,000); Alberta \$128,202,000 (\$120,413,000).

Rescuers Receive Money

Thousands Of Canadians Contributed To Moose River Fund

Toronto.—A total sum of \$78,544.44 has been distributed to Moose River miners who died in the dramatic rescue of two trapped men last April, it was announced by Norman Somerville, K.C., chairman of the Moose River rescue fund committee.

In a final statement of the committee's operations, Mr. Somerville said thousands of persons in all parts of Canada contributed to the fund, administered without expense. He said 346 persons had been declared entitled to participate in the distribution.

Alberta By-Election

Edmonton.—By-election in the provincial constituency of Grouard was ordered in an Alberta writ which set the vote for Nov. 30. Nominations are to be filed Nov. 20. By-election was necessitated by the death in September of L. A. Groux, K.C., Liberal member, who held the seat since 1924.

Can You afford to Use More ELECTRICITY?

If at present you are a user of Electricity you know that you could not afford to be without it. But, if you use it only sparingly, you are not taking full advantage of the services which are available.

Even at the basic rate Electricity is cheap; but once enough energy has been used to satisfy your minimum requirements a FEW ADDITIONAL CENTS will bring you MANY ADDITIONAL HOURS of convenience in the use of an Electric Washer, Vacuum Cleaner or Refrigerator, and of comfort and enjoyment in the use of a good Reading Lamp or the operation of your Radio.

Where can you obtain greater value for so small an added cost as in the full use of your Electric Appliances? What small investment in your home will return you greater, or even equal dividends in comfort and leisure?

The more Electricity you use, the less it costs.

Our local representative will be glad to show you why.

Notice to Creditors and Claimants.

IN THE MATTER OF THE ESTATE OF JOHN A. DUVAL, LATE OF THE DISTRICT OF HOLBORN, IN THE PROVINCE OF ALBERTA.

NOTICE IS HEREBY GIVEN that all persons having claims upon the estate of the above named John A. Duval, who died on the 14th day of September, 1936, are required to file with the Solicitor of the Executor, by the 15th day of December, A. D. 1936, a full statement, duly verified, of their claims and of any securities held by them; and that after that date the Executor will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which has been brought to his knowledge.

DATED this 21st day of October, 1936.

GEORGE J. BRYAN,
Solicitor for the Executor.

Easing the Burden on Purchasers of School Lands.

In an interview granted to the press by Hon. C. C. Ross, Minister of Lands and Mines, he mentioned the problems confronting the purchasers of school lands, many of whom bought at a time when the financial returns from farm produce were very much in excess of today's prices.

The Minister stated that since taking charge of the Department he has been giving considerable thought to the situation and having decided upon the necessity of granting some specific form of relief, action has been taken by proclamation to reduce the interest on the undue instalments of the contracts from 6 p.c. to 4, and interest on arrears from 7 p.c. to 5 p.c.

Such purchasers will have the right to make application to the Registrar of Farmers' Creditors Arrangement Act for a compromise. The Department would write each contract holder as to how the purchaser should proceed if he wishes to take advantage of the legislation.

Sales that have been cancelled since Sept. 30, 1930, may be reinstated if the land is available, and such settlers will have the same privilege to bring their cases before the Registrar for for a compromise or reduction in the terms of the contracts.

Those settlers wishing to obtain advantage of these concessions would be well advised to take immediate action so that they may secure the full benefit offered by these amendments.

One Source Of Revenue

British railways carried more than 12,000,000 pigeons during the pigeon-racing season of 1935. Outside of the coterie of pigeon fanciers in Canada, very few people are aware that Canadian railways also make revenue from the sport of pigeon-racing.

Bookkeeper—The new stenographer's hair is a decided blonde, isn't it?
Boss—Yes, though I did notice a slight inclination around the roots.

Thou Shalt Not Love

— A NOVEL BY —

GEORGIA GRAIG

CHAPTER VIII.—Continued

That was Starr Ellison's deadly fascination—the thousand and one contradictions in her volatile personality that made Michael Fairbourne certain that it had been nothing less than inspiration which had led him to concoct that story about her having Egyptian princess ancestry. He was probably right, without having known it, except by inspiration. If truth were told, she probably had come straight down in a direct line from the sirens of all sirens. It would not have been hard to persuade Michael that Cleopatra herself had sent along her blood—and her allure—through the centuries to the girl-woman who called herself Starr Ellison.

Michael stared down the long room at Lance Marlowe's guests. In the group clustered near the flickering fire on the hearth Starr was almost hidden by the men who surrounded her. Moths, Stephens called them. And Michael Fairbourne realized suddenly, with an attempt at mental castigation, that he was no better than the rest. He felt an uncontrollable impulse to follow wherever she went. But he had no intention of joining that crowd. He would not. At least he could keep his self-respect to that extent. So he remained on the fringe, a dark and angry moth, watching.

The group parted when someone called for fresh cocktails, and Michael saw Starr. Her exotic beauty was like a flame. She was wearing a startling costume this day—which was Russian in effect. It was all black and scarlet with little bands of fur around the throat. She carried a ridiculous little black hat of the same astrakhan that appeared to serve her for gesturing purposes as well as the fan for a Spanish woman, or any of the well known props. Her dusky cloud of hair, beneath a tiny scarlet hat, fell almost to her shoulders.

No one but Starr Ellison would have dared wear an outfit like that, and she knew it. Her clothes were as breath-taking as her conduct. She long since had got out of hand with Michael who at first had considered it his duty to take her shopping. Starr had ideas of her own, and she had not hesitated to let him know it. He could pay the bill—and did—but hers was the selection.

Her eyes met Michael's, and they held each other for a strange, long moment. The girl who was the toast of a city, and the man who had made her what she was.

They had not spoken to each other intimately since their flare-up in the ballroom at Pierre's the night of Starr's debut, just about two weeks before. No longer did Michael come to the penthouse apartment and the living room with the murrhine windows for consultations or intimate chat. That was all over. Their meetings since the party had been but few, and those had been tinged with brittle sarcasm and deadly barbs of caustic wit. Their defiance against each other left steel daggers always drawn, just beneath the surface. Not even an armed truce.

That one long look from gray eyes to black. . . Suddenly Starr left her little group of satellites. A freakish impulse led her to Michael. A provocative slant of those deep-fringed eyes averted the tall, stern-faced man. She stood in front of him, her black eyes lifted to his face. She said audaciously:

"You're elected to take me home, Haas-Michael!"

A stiffness crept over his big frame.

"May I ask why?" he said, his tone itself challenging.

Starr said insolently:

"Because you're the most miserable-looking man present, and you need thawing out." She spread her hands and laughed. "Besides, everybody else is tight, and some of them might have the idea they could drive."

When he did not reply directly, the imperious "Play-Girl" commanded:

**DO THIS when you
wake up with a
Headache**

**ENJOY RELIEF BEFORE
YOU'VE FINISHED DRESSING**

"Aspirin" Tablets
Dissolve Atn. . .
Instantly

In 3 seconds by stop
warming as "Aspirin"
tablet starts to disinte-
grate and go to work.
Drop an "Aspirin" table-
tlet into a glass of water.
By the time the tablet
bottoms of the glass it is
dissolved. This is the
happens in your
stomach.

When you wake up with a head-
ache, do this: Take two quick-act-
ing, quick-dissolving "ASPIRIN"
tablets with a little water.

By the time you've finished dress-
ing, nine aches less, you'll feel
relief coming.

"Aspirin" provides this quick
relief because it is rated among the
quickest methods for relief since
has yet discovered.

"Aspirin" tablets are made in
Canada. "Aspirin" is the registered
trade-mark of the Bayer Company,
Limited, of Windsor, Ontario. Look
for the name Bayer in the form of
a cross on every tablet.

**Demand
and Get—**

ASPIRIN TRADE
MARK BAYER CO.

LOOK FOR THE BAYER CROSS

"Hurry! I've barely enough time
to get home and slip into a bath and
some sort of a dress for Tod Rang-
er's party at the Mayfair tonight."

Neither of them had noticed Lance
Marlowe saunter up but the ever-
present Lance suggested in his
smooth voice:

"Why go home? You can dress
here, Starr."

A ripple of amusement greeted his
words. Starr did not seem to mind
the amusement. She favored Lance
with one of her mysterious smiles.
It might have meant yes—or no—or
perhaps.

Michael quivered suddenly with
black rage. He had not missed the
obvious. For Starr to change, to
dress here, certainly meant that
there would be here something more
for her to dress in than Lance Mar-
lowe's pajamas. Why? Was it true,
then, what people were whispering
about her? Why should she have a
wardrobe, or any part of it, here?
How many times had she stayed here
with Lance?

He burst out savagely:

"You can keep your accommodations,
Marlowe. I'll take her home."
Lance's thin eyebrows rose. "Get
in fun, Mike, old chap—Don't get
the wind up. . ."

And immediately Michael Fair-
bourne was conscious of having made
a transcendental as of himself, by
being serious when everybody else in
the place was ragging. The ripple
of amusement grew to a chorus
which dinned in his ears. Michael
clenched his fists. Starr was laugh-
ing more amusedly than any of them.

Michael was glum and silent as
they rode down in the elevator. His
silence he helped her into his road-
ster, got in and jammed down the
starter. Starr leaned back against
the upholstery and smuggled down
comfortably in her seat, but her
heart was doing a queer little kind
of pounding dance. From the corner
of her eyes she glanced toward the
clean-cut profile of the man beside
her, admiring, in spite of all the will
power she could bring to bear on that
subject, the cut of his linen, strongly
molded, set jaw; his firm, tanned fea-
tures. Why did he have to be so un-
reasonably attractive?

"Don't be more of an idiot than
you can help," she was telling her-

self sternly. "This is a business
arrangement, and you certainly
ought to know it by now."

But even as she watched every
play of his features, saw the keenness
of his gray eyes as they were set on
the traffic, in her heart was one dull
thought. If only things could be dif-
ferent!

Just looking at him gripped a pain
around her heart that had never been
there once in her life before she had
met him. He was so alive and care-
lessly masterful and different. In
spite of the way he had acted as far
as she was concerned, she could not
force it from her mind that he was
basically snar, more honorable, than
any of the rest of that set he played
around with. Certainly he was the
only one who, so far, had not allowed
of the "mysterious" "Play-Girl" to
twist him around her little finger
whenever she chose. And that had
been her whole intention.

Michael was still silent—furiously
so. He cut his way through the
gathering dusk and the maze of
traffic with vicious speed.
For a second Starr closed her eyes.
Her delicate cameo profile was so
white, except for the too-bright
coloring of her defiant young mouth.
"And I am making you very rich,
Michael-Hassan!"

It was the first time since the
night of the debut party that she
had mentioned their bargain.

He said stiffly, without moving his
gaze from straight ahead:

"In the last few days the sales of
my book have jumped amazingly,
thanks to you!"

"Thanks to my complete lack of
reticence as regards the public air-
ing of my love affairs, you mean!"
she corrected him brazenly.

The line of his hard-gripped jaw
was white.

"Starr! How can you?"

Her red lips twisted ironically.
That certainly was funny, coming
from Michael Fairbourne—the man
who had been so insistent in saying
once: "All I ask is that you keep
your name in the headlines—I don't
care how."

Well, she had done that for him.
The name was becoming as familiar
to the reading public as the weather
report. In just the short time since
she had swept onto the New York
horizon like a brilliant meteor, she
had blazed her mad, reckless way
through highly colorful escapades
which could not be ignored—they
were news. She had accomplished
what she had set out to do, too, as
far as she herself was concerned. Her
metamorphosis was complete. Starr
Ellison was lost—she was all "Play-
Girl." It had not taken long, and
now she was pulling the strings.

Men were her puppets.

Michael was snarling roughly:

"What's happened to you, Starr
Ellison? You've grown into some-
thing shallow, and unreal, like a lot
of vivid color painted on glass!"

"Play-Girl" laughed. She echoed:
"Vivid color painted on glass! How
clever of you, Michael-Hassan. You
must remember to tell that to Lance.
He'll think it too divine and pass it
around as he has passed that so-
brilliant remark of mine about my
insatiable appetite for baklava!"

Suddenly his anger got the better
of him. His eyes blazed as his hands
tightened on the wheel until the
knuckles showed white.

"Lance!" he spat out. "Look here,
Starr. I never intended for you to
carry out this thing this far. What
I may have thought about you at
first—well, I've changed my mind. . .
Do you realize what people are hint-
ing about you?"

And then Starr was angry, too. A
deep, bitter anger. The supreme
arrogance of the man! She flared:

"What right have you to tell me
where I shall start, and where I
shall leave off? The only interest
you can have in this is whether
I keep my name before the public or
not—that was distinctly your bar-
gain! I'm doing that—plenty! I'll
carry it all as far as I please! It's
none of your business! Yes, I know
what people are saying—that I am
Lance's mistress!"

She turned to meet the full glare
of his gray eyes as the speed of the
car slackened momentarily. She
drawled impudently:

"Well, what do you think?"

Michael looked long at the veiled
allure of her eyes, at the mocking in-
solenace of her mouth. Then he
studied the almost childlike curve of
her white throat against the dark

fur, and reflected on the everlasting
contradiction of her, as if in very
truth she were the siren type of
another day which his own press
work had made her in the eyes of
the public.

He said hoarsely: "I don't know. I
don't know what to think about you
at all—in any way. I wish to heaven
I did!"

All at once a hot flood of words
fell on her ears.

"I know one thing about you!
You're not the girl I thought you
were when I first found you. . . If I'd
had the faintest idea you were not,
I'd never have let you in for this
thing in a million years. I thought
—I thought—well, never mind what.

It just wasn't so, and if you'd ever
loosen up maybe I'd know just why
you were playing La Luna. . . Never
mind that, either. What I do mind
is now! What's happening to you
down here and all the rest? Your
feeling power and adulation. Don't
you ever give a thought to your fu-
ture? Have you considered what
will become of you when all this has
worn off?"

"I think you warned me once be-
fore that 'Play-Girl' would not last
forever," said Starr placidly, and her
delicate shoulders shrugged. "I'm
not worrying."

"You should be! When 'Play-Girl'
is finished, where will your fair-
weather friends be then—Lance
Marlowe and all the rest? Your
very actions now may forever ruin
your chance for any real future hap-
piness!"

YOU Share In Canada's Greatest Co-Operative Business

LIFE INSURANCE is the greatest co-operative business in Canada. As a policyholder, YOU are associated with more than 3,500,000 other Canadians in this great enterprise.

Every business day last year Life Insurance Companies in Canada distributed, to Canadian policyholders and beneficiaries, over Half a Million Dollars.

Life Insurance enables YOU to provide financial security for yourself and family. It also benefits the country as a whole through the investment of Life Insurance funds in important public enterprises.

Life Insurance dollars give employment to workers throughout the Dominion. Transportation facilities are extended, highways built, streets paved, schools erected, water, sewage and other necessary works constructed. Life Insurance dollars help to finance the farmer, and bring business to the general store and country merchant.

In the past five years of business depression, Canadian policyholders and beneficiaries received over Eight Hundred Million Dollars in payments from their Life Insurance funds. Life Insurance Companies have fulfilled every obligation one hundred cents on the dollar.

As a policyholder, YOU can take justifiable pride in sharing in this, the greatest co-operative business in Canada.

7—Inga Secretary Best at Stony Plain
12—Isador Jazensky's Sale
14—Social credit convention, at Kelly's Hall.
15—English Lutheran service at St. Matthew Schoolhouse.
16—Jacob Miller's Sale
28—United L-A Bazar.

3-Months License for Cars.

It is expected that thousands of Alberta motor cars will be displaying shiny new "stickers" on the windshields at the new year.

These will be temporary licenses permitting the operation of the car until the annual license period opens April 1, to conform with the government fiscal year.

Government officials say that it will be necessary for those who intend to operate their cars during the first 3 months of 1937 to obtain the sticker license.

Whether the fee for this period will be one fourth or one fifth of the price of the annual license has not been announced.

The World of Wheat.

By H. G. L. Strange, Director Research Department,
Searle Grain Co. Ltd.

Wheat prices have bounded up. Why? Simply because the excess, or burdensome world's surplus, has disappeared—it has been eaten up!

So a heavy burden that has been difficult and expensive to carry has at last been lifted from the backs of our Canadian farmers.

W. H. Kuhl's Meeting.

W. H. Kuhl, M. P. for Jasper-Edson, gave an address here on Monday night. The meeting was presided over by Mrs. R. E. Wood, in the absence of W. E. Hayes, M.L.A., thru illness. It is reported Mr. Kuhl claimed the province of Alberta has complete sovereignty, able to pass any laws it wishes, and even to set up its own army if it wanted to.

"Alberta can pass what laws it wishes, social credit or otherwise, and they stand. No power can interfere with them," declared Mr. Kuhl. Alberta could print its own money without any outside interference, he said.

Name Wanted.

The manager of The New Lunch Counter announces a competition for a suitable name for the place. A cash prize will be given the person sending in the name chosen. The contest closes Saturday next, Nov. 7. Get your ballot in early.

Stony Plain and District.

Wednesday next, November 11, is Armistice Day, and a public holiday. All places of business in Stony Plain will be closed. The wicket at the Postoffice will be open from 9 to 10 a.m.

Mr. Roy Compson, one of our popular young men, is spending a short vacation at his home near Lake Eden.

Among the visitors who spent Sunday in town were Ph. Trapp, Edmonton; Alan Stewart, Onaway; and Harry Brox, Killam.

Mr. Arnbruster is having the equipment for the new crushing mill installed, this week and hooked up to the Calgary Power line. Crushing begins next week.

Another social credit convention will be held here on the afternoon of Sat., Nov. 14. A meeting will be held in the evening, when addresses will be given by leaders in the movement.

Mr. Collins, of the C.N.R. staff, has been promoted to another section.

The Tuxis and Trail Rangers enjoyed a delightful party at their club rooms on Hal Lowe's.

Mr. Ted Wince is said to have purchased the James O. Werner property on Fourth ave. west. The house is being altered and repaired by Contractor E. Anderson. When the alterations are completed, the Winces will move up. Ted is still operating a truck service.

Mrs. P. Brennenstuhl has moved to Spruce Grove and is occupying the new Brennenstuhl residence there. Her husband Peter will follow her in a short time, so soon as he has closed his business up at Glory Hills.

BUTTER AND EGGS WANTED at The Royal Cafe.

Before 1928 the world, with an average production and consumption of some 5400 million bu. of wheat, usually carried over each year about 600 million bu., but in 1928 many countries experienced an extraordinary yield, so the year-end surplus suddenly and greatly increased.

More than this, during the years of the depression, people ate less bread, all of which resulted in the usual 600 million bu surplus growing by 1934 to the vast amount of 1158 million.

Since 1934 several wheat producing countries have suffered from very poor crops, and the world has actually produced less than it has consumed, and so the world's burdensome surplus each year has been drawn on until now it has completely disappeared. Not only is this the case, but as well there will be, I calculate, on August 1st next, only 400 million bu. in the world's cupboard for a carryover, instead of the usual 6.0 million.

Just as the increasing surplus depressed prices from 1928 to 1934, so it seems have prices risen as the surplus in turn became less.

The following factors have appeared that have had the effect of pushing wheat prices up: Lack of rain persists in Australia; France is resuming wheat importations; the European rye crop is 6 per cent less than last year.

Factors depressing prices have been as follows: Large wheat shipments from Australia; Argentina, Danubian area, India and other countries; seasonable weather for fall work in Europe; European demand for wheat declining; favorable conditions in the U.S.A. winter wheat belt; increased estimates Japanese rice and Chinese wheat crops.
